OpenVMS Update

Gerrit Woertman
CTO OpenVMS BGSoftware/VMSConsultancy

Amstelveen, 22 november 2017

Some points

- Agenda
- Evaluation form and VSI-goodies
- General observation:
EU GDPR-legislation per May 2018 to protect privacy. Advise keep current with your OpenVMS-environment

About VMSConsultancy/BGSoftware

- VMSConsultancy/BGSoftware is one of the first partners of VSI. We closely cooperate with VSI reselling their OpenVMS products (incl. the Alpha-kit) and support. More info 
- BGSoftware and Infotheek (active in 18 European countries) have joined forces to address the EMEA market.
- BGSoftware partners with Econocom for EMEA hw-support
- Customersupport with planning/migration/systems management. We do this our selves or with (local) partners.
- VSI authorized EMEA training partner
- For the OpenVMS-eco system we resell HPE CockpitMgr, AVTware, PointSecure and NDC security-products, Rovisys SCADA-solutions; eCube for modern cross-platform Eclipse-based remote development tools, DevOps and Middleware tooling; Mimer SQL database.

Questions asked during skypecall with Terry Holmes

1. Basestar - We do not own or have the source code which precludes us from having a Basestar release. We do have a “component” of our companion products of BASESTAR called OMNI and we do have this product just about ready for field test (we are looking for participants) – we need OSAP/H1 first which is in the works.
2. OpenVMS on other hardware-platforms.
X86 is just the start
3. GUI - We are planning on updating GUI in OpenVMS.
